Specify SAS Home

Specify the location where SAS software will be installed on this machine.

i All future installations will be made to SAS Home once this location is established.

SAS Home:

Select Deployment Type

Select the type of deployment you want to perform.

Perform a Planned Deployment

Perform a planned deployment of SAS software using a sample deployment plan or a customized deployment plan created specifically for your site. A planned deployment consists of installing and configuring the software on each machine in the deployment plan. You may choose to perform these steps independently by unselecting a step below.

Install SAS Software

Configure SAS Software

Install SAS Foundation and Related Software

Express path for installing SAS Foundation and related software. A plan file is not used for this type of deployment.

Install Additional Software

Perform individual installs of SAS software by selecting from a list of available software. This option is recommended only when you want to add software to an existing deployment and do not need to perform configuration.

Specify SAS Installation Data File

Specify the full path to your SAS installation data file.

Details of the selected SAS installation data file:

Product: SAS 9.3

Platform: Microsoft Windows Workstation 32-bit

Order: 99CS61

<u>Licensed SAS Foundation Software</u>	<u>Expiration Date</u>
---	------------------------

Base SAS	31JUL2012
----------	-----------

Education Analytical Suite	31JUL2012
----------------------------	-----------

SAS Bridge for ESRI	31JUL2012
---------------------	-----------

SAS Enterprise Guide	31JUL2012
----------------------	-----------

SAS Integration Technologies	31JUL2012
------------------------------	-----------

SAS/ACCESS Interface to Aster nCluster	31JUL2012
--	-----------

SAS/ACCESS Interface to DB2	31JUL2012
-----------------------------	-----------

SAS/ACCESS Interface to Greenplum	31JUL2012
-----------------------------------	-----------

SAS/ACCESS Interface to MySQL	31JUL2012
-------------------------------	-----------

SAS/ACCESS Interface to Netezza	31JUL2012
---------------------------------	-----------

SAS/ACCESS Interface to Oracle	31JUL2012
--------------------------------	-----------

Select Language Support

Select the languages for your software to support.

Select the languages you would like to install for the products listed below.

SAS Enterprise Guide
SAS Foundation
SAS Integration Technologies Client
SAS Providers for OLE DB
SAS/GRAPH ActiveX Control
SAS/IML Studio

- Arabic
- Chinese Simplified
- Chinese Traditional (Hong Kong SAR)
- Chinese Traditional (Taiwan)
- English
- French
- German
- Hebrew

Select Regional Settings

Select the appropriate regional settings for your SAS software.

The region format controls how SAS software displays text, numbers, currencies, date and time values, and sorts data. Select the region format appropriate for your SAS software.

Language (Region) [Locale] **English (United States) [en_US]**

If this deployment will support multiple languages that cannot all be represented with a single encoding, you can configure SAS software as a Unicode server and override the default SAS encoding option setting and force SAS to use UTF-8 encoding in all cases. This will result in all datasets, catalogs and text files written by SAS to be written in UTF-8 encoding. This can be useful when sharing data with computers located in various countries with different single-byte and multi-byte language representations, but will make it more difficult to share SAS data with others who use default encodings.

Configure as a Unicode server

Checking System

Tooling initialization complete

160 / 160 (100%)

Examining File System

21,797 / 21,797 (100%)

Required disk space: 4,333 MB

Available disk space: 90,156 MB

If any files are shown below, installation cannot proceed because some of the files that need to be added/modified/deleted are either locked or do not have write permissions. Once the installer has finished scanning your filesystem, please quit any SAS applications that might be running and locking files, and add write permissions to those files that are not writable. Once you have done this, click the Refresh button. If you choose not to remediate the problem at this time, simply click the Cancel button to quit.

Unwritable files: 0

Deployment Summary

Review the software selected for deployment. This is your last chance to go back and make changes before writing to your system.

Stage 1: System Requirements

1. Microsoft Web Services Enhancements 3.0
2. Microsoft Runtime Components 7.1

Stage 2: Installation

1. Java Platform Standard Edition Runtime Environment
2. SAS Deployment Manager
3. SAS/SECURE Java Component
4. SAS Providers for OLE DB (32-bit, English)
5. SAS Providers for OLE DB (64-bit, English)
6. SAS Integration Technologies Client (32-bit, English)
7. SAS Integration Technologies Client (64-bit, English)
8. SAS/GRAPH ActiveX Control (32-bit, English)
9. SAS Diagram Control (32-bit, English)

Select Support Option

Select the support option you want to use.

Upon installation, SAS software will forward to SAS via electronic transmission certain information about the SAS software products installed in your computer environment, including relevant hardware and platform information and software products upon which SAS software is dependent. The transmission will not contain any information concerning any individual, and the information will be used only for SAS' internal business purposes. You will have the opportunity to review this information prior to it being forwarded to SAS. More information about this installation process can be found at:

<http://support.sas.com/eregistration>
